DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of Group I (claims 1-11) in the reply filed on 5/26/07 is acknowledged. The traversal is on the ground(s) that the Examiner can search the entire application without serious burden. This is not found persuasive because the different groups are classified in different areas and require unique search queries.

The requirement is still deemed proper and is therefore made FINAL.

Claim Objections

2. Claim 7 is objected to because of the following informalities: the claim ends in a semi-colon, thus making it unclear as to whether or not this is the end of the claim. Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. Claims 7-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 7, "the carbonated soaping subsystem" lacks prior antecedent basis thus rendering it and all claims depending therefrom, indefinite.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Irwin (6446578). Irwin discloses an animal washing system, comprising: an aeration subsystem (41) which supplies air from a compressor; and a cleaning subsystem (43) adapted to receive a water flow and being coupled to the aeration subsystem and having an output port (45).

6. Claims 1 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Parker et al. (6443164). Parker et al. disclose an animal washing system, comprising: an aeration subsystem (53) which supplies air from a compressor (82); and a cleaning subsystem (col. 11, lines 56-67) adapted to receive a water flow and being coupled to the aeration subsystem and having an output port (51).

7. Claims 1 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Dahl et al. (6302058). Dahl et al. disclose an animal washing system, comprising: an aeration subsystem which supplies air from a compressor; and a cleaning subsystem (50) adapted to receive a water flow and being coupled to the aeration subsystem and having an output port (25).

Allowable Subject Matter

8. Claims 2-5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

9. Claims 7-11 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
